

# SnowMirror is a smart replication tool for ServiceNow™

Load data from a ServiceNow instance and store it in a relational database installed in your local environment.

Use the mirror database for custom reporting, data warehouse loads, system integration, data backup and more.

# SnowMirror is a smart replication tool for ServiceNow™

## What our users say:

*"Compared to a SSIS/ODBC solution, with SnowMirror we saved 99% of the time on developing staging packages for our data warehouse."*

Jesper Christensen, Region Hovedstaden Denmark

*"Thanks to SnowMirror, we have a proper database to use for reporting and analytics, that was achieved even while using ServiceNow."*

Hiteshwar Gawande, Syngenta Services Pvt Ltd

*"We chose SnowMirror due to its cost, performance and reputation."*

Daniel Critchley, Acora Ltd
